truthgraph.

ENTERPRISE SOFTWARE LICENSE

Your code. Your infrastructure.

US$5,000 / year

Annual only | Sales-assisted | Version: 15 October 2026

On-premises deployment option with all core graph and context features: authorized repository indexing, source provenance, dependency retrieval and agent context through MCP/HTTPS.

Unlimited licensed repositories, users, queries, indexing and context bundles. Infrastructure capacity and supported extractors determine practical throughput and coverage. No per-seat or usage-based license fee.

Deployment scope, operating environment, support, delivery date and renewal arrangements are agreed in an order before purchase. No SLA or custom integration is included unless expressly agreed. This offer is not currently available through hosted Paddle checkout.

Applicable taxes and the final amount are confirmed before purchase. Our first software subscription payment is fully refundable when requested within 14 calendar days, including business customers and customers who used the software. Mandatory legal rights remain unaffected.
